

Collaborative Virtual Reality Platform for e-Learning: Teaching Communication

NEWSLETTER n° 4

 Co-funded by the European Union
2020-1-PL01-KA226-VET-095931

Our project is moving forward!

Read on to find out what's been going on in the last few months.

Want to become a certified VR trainer?

Visit our website and find one of the main results of our project, the [e-learning platform](#) "COViR Learning System", which offers knowledge and skills that a trainer should acquire in order to get certified.

With this, we seek to train and certify trainers from each partner country (Cyprus, Greece, Poland and Spain) so that they can subsequently provide training in communication skills applied to virtual reality, since the aim is to test for the needs of the subject "Communication Skills", which is considered a difficult subject to teach online.

The platform includes a course composed of 4 modules and 30 activities, and is available in the 4 official languages of the project: English, Greek, Polish and Spanish.

Anyone can enrol and it is completely free of charge!

COViR participates in "Future of Retail Conference 2022"

The project was presented at the Future of Retail Conference in Athens on 27 to 29 May 2022. During the event, COViR was represented by our Greek partners, SENSEWORKS and ESEE.

Organised by our partner, the Hellenic Confederation of Commerce and Entrepreneurship (ESEE), the Future of Retail is a leading discussion forum on the state of commerce, and ESEE's role is to expand on the future of technology in the retail sector and the vital role that cloud computing will play.

And we are also on the radio!

Our partner Fundación Equipo Humano attended the Spanish radio programme "La Tarde con Marina" on 99.9 Plaza Radio to talk about our innovative European project and, thus, what the application of virtual reality in the field of education means and what advantages can be derived from it.

Do you want to keep track of the progress of our project? You can follow us on our social media, where you will find all the news related to COViR activities and results!
